

TASKI aquamat 20

Compact all-purpose spray extraction machine

TASKI aquamat 20 brings you:

- Excellent Deep Cleaning Results
- All-Round Flexibility
- Ease of Transportation
- Complete Range of Accessories

Excellent Deep Cleaning Results

Deep cleaning through spray extraction is the ultimate way of thoroughly cleaning your carpets. It increases the lifetime of your carpets by removing engrained dirt whilst maintaining the high appearance levels of your carpet.

All-Round Flexibility

Its tank volume makes the TASKI aquamat 20 ideal for the deep cleaning of small to mid-sized congested areas. The powerful vacuum motor allows for an optional 6 meter hose to be attached, so that you can leave the machine at the bottom of the stairs or outside the cleaning area, increasing your flexibility. The variable product dosing allows for efficient and productive cleaning as well as the ability to tackle deeply soiled areas.

Ease of Transportation

The user friendly design, large wheels and steering handle allow for easy movement between locations.

Complete Range of Accessories

The spray device can be used to pre-spray carpet detergent before deep cleaning, maximising cleaning results. The optional 12cm hand nozzle facilitates deep cleaning of upholstery, stairs and other hard to reach areas. The carpet pile brush lifts the carpet fibres and gives the entire surface a uniform, even appearance and reduces drying time.

Technical Data

Solution tank	22 l
Recovery tank	18 l
Max air flow	47 l/s
Vacuum	22 kPa
Dimensions (LxWxH)	800x380x720 mm
Weight	25 kg
Nominal consumption	1050 W
Sound level	66 dB(A)
Cable length	15 m
Protection class	II
Approvals	TÜV

Spray pressure bottle, 7.5 l

Spray lance with extra long hose (5 m)

Replacement bristle wreath for hard floor tool set

Description of features

Suited for Hard Floor and Carpet Cleaning

Depending on the accessories chosen, the TASKI aquamat can either be used for hard floor cleaning or carpet spray-extraction. When choosing both toolsets the TASKI aquamats really become a multi-functional piece of equipment.

The hard floor tool is especially suited for small to medium-sized areas like kitchens and washrooms. The solution spray, together with the hard floor bristle, provides effective mechanical action.

With the direct method the soiled solution is directly removed from the floor. With the indirect method, the solution is left on the surface for a short period to increase contact time and is then removed with the hard floor tool by using the vacuum function of the TASKI aquamat. The tool provides excellent cleaning results, also on difficult to clean hard surfaces like ceramic tiles and anti-slip floorings.
